

What They Are

Slow no wake zones are areas of restricted speed where boaters are asked to minimize idling enough to allow steer ability while maintaining as minimum a wake as possible.

They are requested by citizens to reduce potential boating accidents, damage to existing docks or piers, and to increase public safety.

Annually, slow no wake zones are reviewed at the November Harbor Commission meeting. La Crosse County and City residents requesting a slow no wake zone should contact the City or County Staff prior to the November Harbor Commission meeting.

Regular meetings are the third Monday:
Jan; Mar; May; July; Sep; Nov | 4:30 p.m.
County Administrative Center
212 North 6th Street, La Crosse
