

Campfire Safety

Sitting under the stars by a crackling fire has its appeal. It's where stories are told, sing-a-longs happen, and meals are cooked over an open flame. Campfires bring family and friends together. But campfire mishaps can cause injuries. With a few safety tips, you can prevent these accidents.

SAFETY AROUND THE FIRE

- Before setting up a campfire, be sure it is permitted. **A permit is required in the City of La Crosse.**
- If campfires are permitted, they need to be at least 25 feet away from any structure and anything that can burn.
- Clear away dry leaves and sticks, overhanging low branches and shrubs.
- Avoid burning on windy, dry days. It is easier for open burning to spread out of control when it is windy and dry.
- Watch children while the fire is burning. Never let children or pets play or stand too close to the fire.
- Attend to the campfire at all times. A campfire left alone for only a few minutes can grow into a damaging fire.
- Keep a campfire small which is easier to control.
- Never use gasoline or other flammable or combustible liquids.
- Always have a hose, bucket of water, or shovel and dirt or sand nearby to put out the fire. Make sure to put it completely out before leaving the site.
- If your clothes catch fire, stop, drop, and roll. Stop, drop to the ground and cover your face with your hands. Roll over and over or back and forth until the fire is out.
- Treat a burn right away. Cool the burn with cool water for 3 to 5 minutes. Cover with a clean, dry cloth. Get medical help if needed.

ROAST WITH CARE

If roasting marshmallows, help young children. Never shake a roasting marshmallow. It can turn into a flying, flaming ball. A heated metal skewer can cause burns.

FACT

Campfire accidents send thousands of people to emergency rooms with burn injuries every year.
