## Introduction/Overview

The City of La Crosse is pleased to submit the 2023-2027 Capital Improvement Plan (CIP) to the citizens of La Crosse and the City Council Members. The Plan is a 5-year plan, adopted by the City of La Crosse, detailing the capital outlays over the next 5 years that will serve and enrich the lives of City residents in line with the City's core values and mission. The CIP represents the City's plan for development and is intended to balance the City's capital needs with its fiscal responsibility and financial limitations. The five-year plan is reviewed on an annual basis to adjust for changing needs/priorities of the community and changing framework of ongoing projects.

### CIP Appropriations

The first year in the Capital Improvement Plan is the year that actual appropriations are authorized by the Common Council. The remaining four years are guides for future development of City infrastructure.

### Capital Improvement Plan Policies

The Capital Improvement Budget includes both Capital Equipment and Capital Projects. A Capital Project is defined in the municipal code as a project that is expected to have a useful life of over one year and provide a minimum asset value over \$20,000. Capital Equipment is an outlay for equipment that is expected to have a useful life of over one year and provide a minimum asset value over \$10,000.

The City will prepare and adopt a 5-year Capital Improvement Plan (CIP) to systematically identify, plan, schedule, finance, track, and monitor capital projects to ensure cost effectiveness as well as conformance to established policies.

New projects and equipment that require annual operating and maintenance costs must be added to the appropriate department's annual operating budget.

Any unanticipated projects and equipment not previously listed in the capital budget requiring immediate funding from the Capital Budget will require a two-thirds vote by the Common Council members present at the time of adoption to be included.

Project implementation shall be the responsibility of the Board of Public Works. The Board of Public Works will ensure that all projects enumerated and funded in the adopted annual Capital Improvement Budget are designed, bid, purchased, and constructed.

## CIP Planning Structure

Capital project and equipment requests are submitted to the Finance Dept by each Department in the City. The CIP consists of two separate documents: A Capital Project Budget and a Capital Equipment Budget. There are two main committees that oversee the planning of the CIP. The Board of Public Works reviews and approves the Capital Equipment requests. The review and approval of the Capital Projects is the responsibility of the City Planning Commission. These respective boards approve the recommended budgets for ultimate approval by the Common Council.

# Capital Budget Process Timeline

## Tax Incremental Financing (TIF)

Tax Incremental Financing (TIF) generates tax revenue that can be used to fund infrastructure investment and other eligible projects that will facilitate private development. When a Tax Increment District (TID) is created, the current value of all the taxable property within the defined boundaries is established. This value is the “base value” of the TID. The taxes collected on this portion of the property value are shared by the overlying taxing jurisdictions, and once the TID is created this portion of the tax collections is allocated as it was at the creation of the TID. (See Figure 1)

Over the life of the TID, the county, school district, technical college and municipality collect taxes generated from the TID base value. Meanwhile, new construction and investment increase the value of the district. All of the taxes collected on the growth in value of the district (or the "value increment") are turned over to the City as "tax increment" revenue. The City uses this revenue stream to pay for improvements that it made within the district which were in the approved project plan.

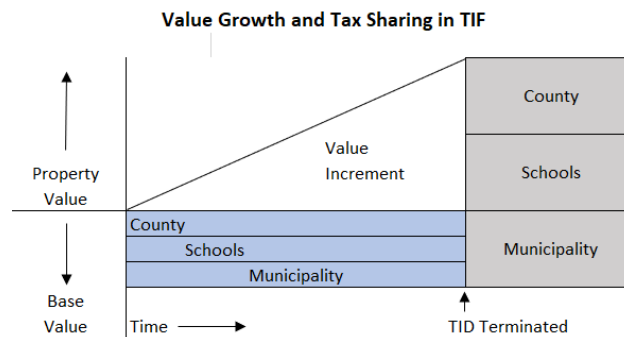

Figure 1

At the end of the maximum life period, or as soon as tax increments are collected in excess of total approved project costs, the TID is terminated. The entire value of the property that was in the TID is returned to the tax rolls of the overlying taxing jurisdictions. While the TID exists, the tax collections for each overlying jurisdiction are limited to the base value of the TID parcels. After termination of the TID, all of the overlying taxing jurisdictions share in a much larger tax base. Ideally this means that rates can be lowered to generate the same amount of revenue for the jurisdiction.
